

PURE[®] Index

只需尿瓶樣本!!
ONLY requires a urine sample!!

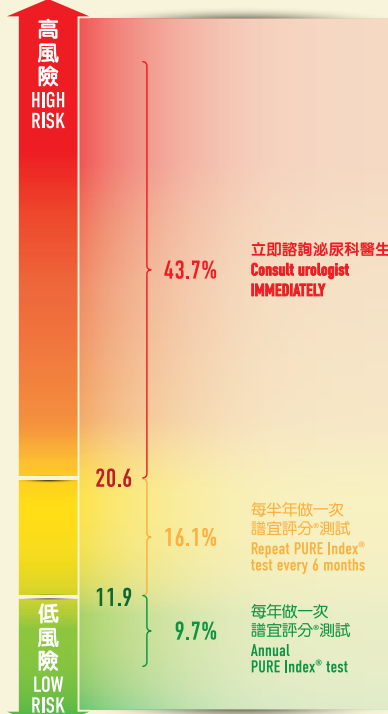

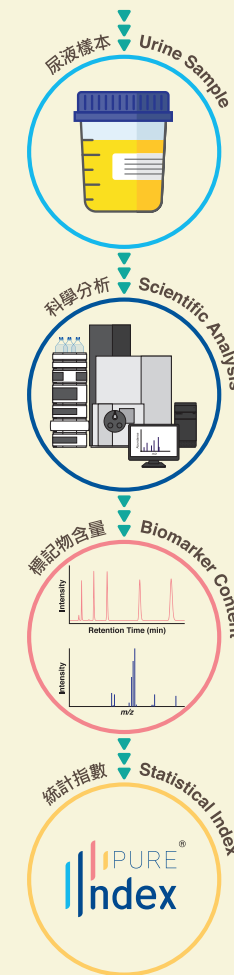

譜宜評分[®]值*越高，前列腺癌的風險越高。

The higher the PURE Index[®] level*, the higher the risk of Prostate Cancer.

下圖將風險臨界值設置為陰性預測值的90%和87%：

The risk cutoffs were set at 90% and 87% negative predictive value for the following illustration:
